PROJECTS

Youtube RAG Pipeline (Github: https://github.com/Hetchman/youtube_rag)

- Built an end-to-end RAG system to process YouTube videos into queryable knowledge
- Implemented chunking, embedding generation, and vector indexing for semantic retrieval
- Designed retrieval flow to return grounded, source-backed answers
- Explored trade-offs in chunk size, retrieval accuracy, and response quality
- Evaluated retrieval quality through manual testing of answer relevance and grounding

Hellolife (Github: https://github.com/Hetchman/dhis_health)

A web application displaying organization units, tables, charts, and maps using data from the DHIS API.
